Q(b)

adNumber — **wName** — name — dateB — **dName** — Gender — Address — telNumber

Patient — Admission — Ward

wName

dName   **wName**

Treats — Doctor — Employee

dateB — numYear

List — Nurse

numYear

dateB

adNumb — **nName** — nName — **wName**

I make changes to the ERD. Because I noticed that there are many to many relationships between the Patient and the Nurse. To simplify added new entity - List.
